

PRANAV GOPAL KARANDE

AI/ML Engineer

☎ +91-8983116124 ✉ pranavkarande5@gmail.com 🔗 linkedin.com/in/pranav-karande 🐙 github.com/TECHYpranav07

Summary

Electronics and Telecommunication Engineering (ENTC) student with a strong passion for Artificial Intelligence and Machine Learning. Experienced in developing RAG systems, LLM applications, and deep learning models. Proficient in LangChain, FAISS, Hugging Face, and AWS, with a proven ability to build and deploy intelligent AI solutions using Streamlit.

Skills

Programming: Python

AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, RAG, LLM Applications

LLM Stack: LangChain, FAISS, Hugging Face, Embeddings, Prompt Engineering, Vector Databases

Cloud & Deployment: AWS (EC2, S3), Docker, Streamlit

Tools: n8n, Git, GitHub

Experience

Edunet Foundation (IBM SkillsBuild)

Jul 2025 – Aug 2025

AI Intern

IBM Watson Assistant, NLP

- Developed an AI-powered travel recommendation chatbot using IBM Watson Assistant.
- Implemented NLP-based intent recognition and automated response handling.
- Designed conversational workflows to improve recommendation accuracy and user engagement.

Cloudnautic

Jun 2024 – Aug 2024

Cloud DevOps Intern

AWS, EC2, S3, Docker

- Deployed and managed AWS EC2 instances with security configurations and monitoring.
- Worked with Amazon S3 for cloud storage management and access control.
- Built and deployed applications using Docker containerization technology.

Projects

Hybrid RAG Knowledge Assistant | Python, LangChain, FAISS, Streamlit, RAGAS | GitHub

May 2026

- Built a Retrieval-Augmented Generation (RAG) system using LangChain, FAISS and Hugging Face embeddings for semantic document retrieval.
- Implemented hybrid retrieval and document processing pipelines to improve context relevance and response quality.
- Evaluated performance using RAGAS metrics and deployed the application on Streamlit Cloud.

AI Productivity Assistant | Python, n8n, Google Sheets

Mar 2026

- Developed an AI-powered task management assistant using n8n workflow automation.
- Integrated Google Sheets for persistent storage, reminders and task tracking.
- Designed webhook-based workflows for seamless user interaction and automation.

Heart Disease Detection using Deep Learning | Python, CNN, CapsNet

Jul 2025

- Developed CNN and Capsule Network models for ECG-based heart disease classification.
- Performed feature extraction and model evaluation using standard classification metrics.
- Project secured 2nd Place at Technophilia'25, MIT Academy of Engineering.

Awards & Certifications

- **2nd Place – Technophilia'25:** Secured second position for ML-based Arrhythmia Detection project at MIT Academy of Engineering.
- **AI and RAG Using LangChain – IBM SkillsBuild**
- **NPTEL – Deep Learning for Natural Language Processing (IIT Kharagpur)**

Education

B.Tech Electronics & Telecommunication Engineering

2023 – Present

MIT Academy of Engineering, Pune — Expected 2027

CGPA: 8.22/10
